Overview

Gideon Korrell is an associate in Hopkins & Carley's San Jose office and a member of the Intellectual Property Litigation Practice. His practice focuses on litigating complex and high technology cases. As a former practicing engineer, Gideon has experience and knowledge of designing and developing high-technology applications in both the public and private sector.

Gideon handles cases of federal claims for patent, trademark, and copyright infringement as well as business tort claims of trade secret misappropriation and unfair business practices. He has represented clients in state and federal courts across the country, the International Trade Commission, and at the U.S. Patent and Trademark Office. Gideon has also drafted patent applications, represented requestors and patent owners in reexamination proceedings at the U.S. Patent and Trademark Office (USPTO), and has advised clients on licensing and acquisition strategies.

Prior to joining Hopkins & Carley, Gideon worked for several Am Law 100 firms in addition to being in-house counsel for a large technology company based in Silicon Valley.

hopkins carley

Before practicing law, Gideon spent several years as an electrical engineer designing and building computer data acquisition systems for the nuclear energy industry. He also has experience working in the telecommunications industry and at a U.S. naval research lab where his research focused on the development of technology for actively monitoring and canceling vessel electromagnetic signatures and other mine countermeasures.

Gideon's legal practice has included cases involving technologies such as:

- Phased array radio communications
- Optical filters and switching (both MEMS and LCOS)
- Semiconductor manufacturing and testing equipment
- RF circuit design and LED construction
- Computer hardware and operating systems
- Medical devices and surgical tools
- Military armor and training equipment
- Radiation shielding technology
- Consumer products
- Various mobile- and internet-related applications
